

Portable Drone Jammer Suitcase

Keda AUDS - 2458/2458PRO

Full-band interference, support customization.

Removable battery design for long-term operation

Single-person portable, ready to use

Can identify mainstream models such as DJI and Autel, as well as various models including homemade drones, WiFi - connected drones, and racing drones.

Item	Keda AUDS – 2458	Keda AUDS – 2458 Pro
Manufacturer	From Keda Jammer	
Freq	2.4 GHz & 5.8 GHz(Full-band interference, support customization)	
Working Mode	Continuous interference across the entire frequency band	Spectrum monitoring → target identification → directional interference
Responsespeed	≤3seconds	≤1.5 seconds(interference link establishment detected)
OFDM Signal Analysis	Not supported	Support (identify drone communication characteristics)
Multi-target processing capability	Maximum 8 channels	Maximum 16 channels
Typical deployment scenarios	Temporary event security	Long-term deploymentinhigh-density sensitive areas
Interference distance	1 - 1.5 km	1.5 - 2 km
Typical deployment scenarios	Long-term deploymentinhigh-density sensitive areas	
Built-in Battery	48 V lithium battery	
Storage temperature	-20℃～60℃	
Weight	8.5±0.1kg	
Dimensions (L*W*H)	400 * 320 * 210mm	
Applications	Military Patrols & Forward Operations,Border & Customs Checkpoints,VIP Event Security,Critical Infrastructure Protection,Disaster Response & Temporary Zones,etc.	

System Operation Guide

1.Quick Start Process

- (1)Safety check: Make sure the antenna is firmly connected and there are no people around.
- (2) Powerconnection: Connect to a regulated power supply (UPS is recommended)
- (3)ModeSelection :

- Basic version: directly press <Start> to enter full-frequency interference

- Smartversion: Select [Auto Protection] mode through the touch screen
- (4)Status monitoring: Observe indicator light (green: ready; red: working)

2.Advancedfunction settings (version 2458 PRO only)

- (1)Whitelist management: authorize specific devices to communicate with exemptions.
- (2)Electronic fence settings: Customize 3D protection area.
- (3)Logexport: record all defense events (time/GPS coordinates/drone type)
